

Product Comparison Matrix

Why Proxim ORiNOCO AP-4000 is the highest performance Wi-Fi access point for the enterprise

Competitive throughput performance (download)

- Pre-configured with tri-mode
- Better range and throughput
- Higher capacity
- Proactive rogue AP detection security in both 2.4 and 5 GHz bands
- Higher throughput, more effective repeating
- Simple to deploy and manage

Feature	Proxim AP-4000	Proxim AP-2000	Cisco 1231
Radio Configurations	b/g and a	b/b, g/g, b/g, b/a, g/a	b/g and a
Transmit Power	11b: 20 dBm; 11g: 20 dBm; 11a: 20 dBm	11b: 15 dBm; 11g: 20 dBm; 11a: 17 dBm	11b: 20 dBm; 11g: 15 dBm; 11a: 16 dBm
Adjustable Transmit Power	Yes	Yes	Yes
Security	WPA, upgradeable to 802.11i, rogue AP detection in both 2.4 and 5 GHz bands	WPA, upgradeable to 802.11i, rogue AP detection	WPA, upgradeable to 802.11i, rogue AP detection
Management	SNMPv3, Telnet, HTTPS	SNMPv3, Telnet, HTTPS	SNMPv2, Telnet (SSH), HTTP
Multiple VLANs	Yes, with different security contexts	Yes, but not with different security contexts	Yes, with different security contexts
Repeating	Yes	Yes	Yes
Auto-network Configuration	Yes	Yes	No
Dual Firmware Image Support	Yes	Yes	No
802.3af	Yes	Yes	No
Plenum	Yes	Yes	Yes
